

# Eastway Technical Consultants Ltd.

*Professionals in Condition Monitoring*

Eastway was established in 2001 and since then we have been improving reliability and energy efficiency for our clients throughout Ireland and the UK with great success. We recognise the many benefits of condition-based monitoring and provide a range of condition monitoring, energy saving and maintenance services, as outlined below.

Due to our specialist range of services our clients can benefit by engaging with one supplier, saving costs, increasing accountability and therefore improving overall reliability. Our team consists of qualified professionals with both academic and industrial experience and we offer our clients a high quality service, with top of the range technology and experienced personnel.

## **Our Services include:**

- Vibration Analysis, Balancing & Laser Alignment
- Thermography (Electrical and Mechanical)
- Ultrasonic Leakage Management (Compressed Air, Nitrogen, Argon, etc)
- Industrial Energy Audits
- Steam system surveys/ Steam trap detection
